

ALUMINIUM TAPE

ALUMINIUM TAPE is made of aluminum with a self-adhesive acrylic coating. This tape it is highly temperature and age resistant. Temperature resistance up to 140 °C.

Aluminium tape is used for sealing joints and connections. It is also suitable in automotive industry. That soft aluminum tape is also easy to use on uneven surfaces.

TECHNICAL DATA

Colour	Silver
Material	Aluminium
Adhesive	Acrylic
Thickness	0,035 mm
Width	50mm / 100 mm
Lenght	50 m
Weight	500 g/m ²
Tensile strenght	27 N/cm
Adhesion to steel	3,4 N/cm
Elongation	3%
Temp. resistant	-20°C ... +140 °C
Testing method	ASTM D-1000
Rolls in box	24 / 12

NB! The information shown can not be considered as a guarantee. Before using it is advisable to test the suitability of the product on the surface.
